

Evolphin

Cloud Solutions

VideoLX Hybrid

On-premises storage synced with the Evolphin MAM in the cloud for mid-sized businesses

VideoLX Pure Cloud

Edit stations and high-res media ingested and edited directly in the cloud. No on-premises infrastructure needed

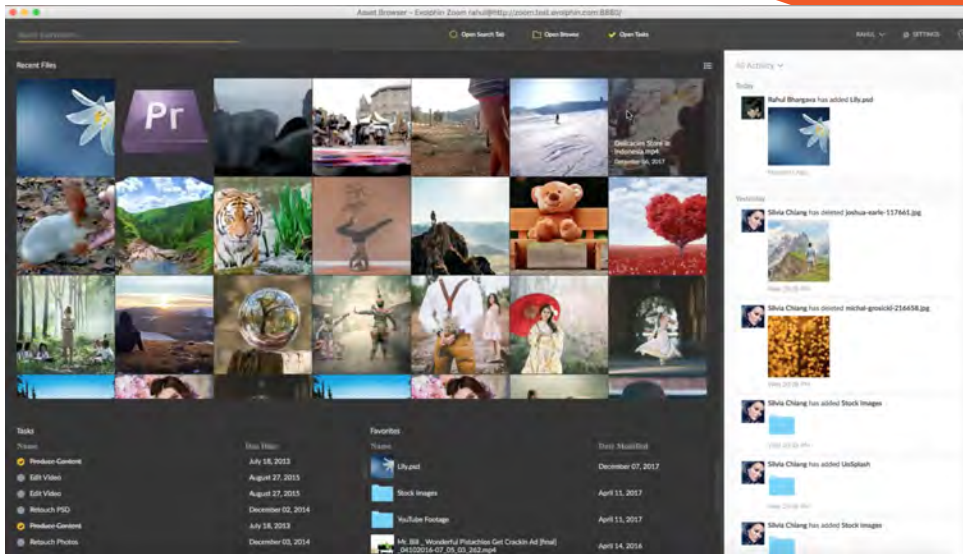

Evolphin Wave

Lightweight cloud-based review and approval for small businesses

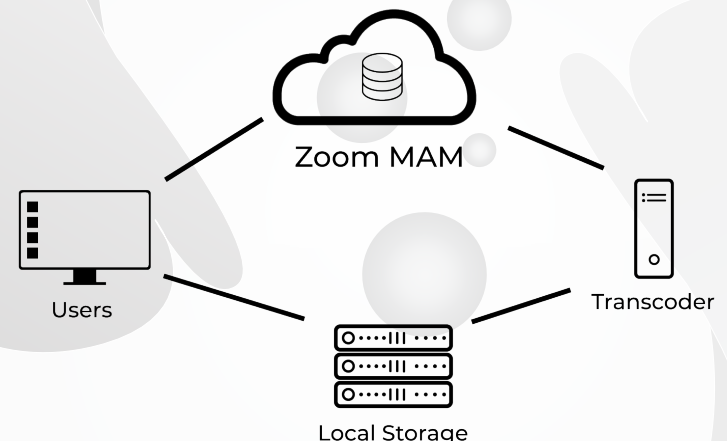

Custom Cloud

Full service custom deployment mixing on-premises and cloud infrastructure as needed for large enterprises

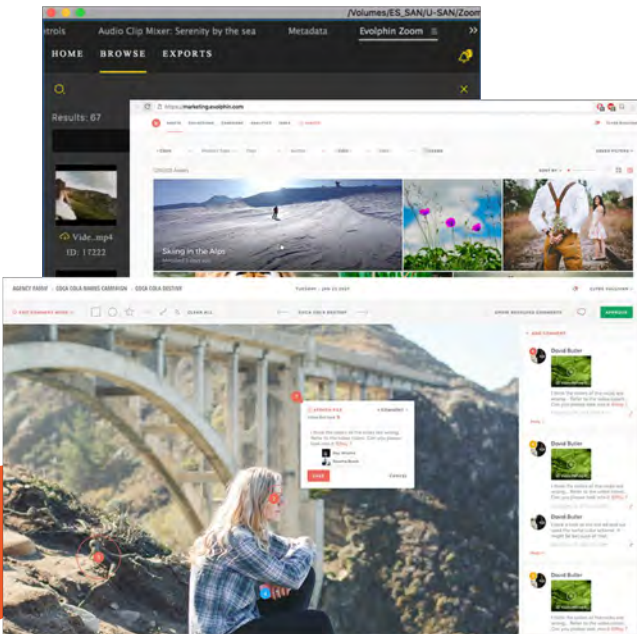

VIDEOLX HYBRID

- Evolphin MAM in the cloud or on-premises for mid-sized businesses
- Bring your own private cloud or use Evolphin SaaS model
- Evolphin Transcoder automatically generates proxies of high-res video
- High-res video remains on-premises while proxies sync with the MAM, avoiding uploading all your media to the cloud
- 1-click switching between proxies and high-res video in Adobe Premiere
- Cost effective and hardware agnostic

VIDEO LX PURE CLOUD

- Evolphin MAM and Ingest Modules in the cloud
- Windows-based edit workstations in the cloud
- No on-premises infrastructure needed other than a web browser to access remote edit desktops
- Ingest, transcode, edit, and export workflows are all implemented in the cloud
- Can be paired with Evolphin Managed Admin Service to eliminate most IT overhead
- Bring your own private cloud or use Evolphin SaaS model

CUSTOM CLOUD

- Custom deployment for large enterprises
- Deploy infrastructure on-premises and in the cloud as needed
- Workflow and infrastructure consulting for optimum results
- MAM and Preview servers can be deployed worldwide
- Zoom Non-Stop for multi-database syncing and high availability disaster recovery
- Automatic proxy and mezzanine generation on ingest using integrations with leading hardware transcoders
- Seamless integration with archival solutions
- Rich API access for unlimited integrations with third-party solutions

EVOLPHIN WAVE

- Cloud-based SaaS
- Drag and drop to upload videos, images, and documents
- Fast and easy to use
- WYSIWYG theme editor for branded presentations
- File transfer tools
- User rights management
- Clients and team can leave timecode-accurate comments
- Mark comments as done when addressed
- Flexible link management for sharing media

ABOUT EVOLPHIN AND ZOOM

Evolphin Software is the first of its kind in Rich Media Asset Management. Zoom leverages the industry's first high-performance in-memory deduplication of content, allowing users to create, share, and collect insights, and provide rich media to their clients in the fastest way possible. See Zoom in action for a different approach to media workflow management that will make you re-think conventional wisdom with a new generation of products and capabilities. Companies around the globe, covering the Advertising, Broadcasting, Media/Entertainment, Retail, and Healthcare industries, currently deploy Zoom.
